Damaged Plane Delays Fliers

A damaged plane delayed the arrival of the planes here on Wednesday until early afternoon, and then only two were able to be on hand. There was a good turn out of spectators and the planes were busy carrying passengers until dark. The parachute jump was made by Wild Irish Haddock and all eyes were turned towards the grounds for this event.

Relief Work To Be Undertaken

Notice has been received by the Municipal District of Vermilion that \$2500 has been allotted for relief work in their district. The Federal and Provincial governments and the Municipal District will be the contributors in about equal amounts as far as is known. The rates of pay have been defined, and the fact that this work is to be distributed among the destitute only is emphasized. As the district engineer puts it "The whole idea is to provide a small amount of money for the necessities of life, and not to pay bills or taxes." An effort will be made to start the work at the earliest possible time so that it may be completed before freeze up.

J. G. Daugharty Tells "Some Story"

J. G. Daugharty, an old-time resident here, but now living at Des Moines, Wash. is in Champion on an annual visit. It may have been that Mr. Daugharty was always a raconteur of note, but if not he has certainly developed a lively talent in this connection. It is a matter of regret that space does not permit of the reproduction of some of his stories for the benefit of our readers. Perhaps you can mail him and demand a few of them.

Harvest Dance Friday Night

Under the auspices of Champion B.P.O.E. a Harvest Dance will be held in the Community Hall on Friday evening, Sept. 18. Bastyn's orchestra, which plays for the dances at Henderson Lake in Lethbridge, will provide the music. Admission 50c per person. This may be counted upon as the event of the season in the dance line.

Help Open Shooting Season

A quartette of brave men, opened the duck and goose season on Tuesday. They were Messrs. Ulrich, Sutton, Campbell and Ditto. They ran into two cloudbursts, going and coming from Vauxhall but nevertheless, the goose hangs high and their ducks were plentiful.

E. Latiff's groceries was opened up on Saturday, and the manner in which the building was laid out, although there is still some additions to be made in the front of the store, met with general appreciation.

Reid Hill Fair Thurs. Sept. 24

The Reid Hill school fair will take place on Thursday, Sept. 24th. This school fair has made a record for itself as one of the most attractive events of the kind held in this part of the country. The exhibits have a wide range, including live stock, garden produce, school work, sewing, woodwork, etc., and to judge by the prize list of last year the various classes were crowded with exhibits. It will be well worth the while of anyone and everyone who can attend this year's fair.

Keep Beef Cattle From Stink Weed

Horace Gill wishes to warn the farmers of this district, that after cattle are pastured on newly threshed stubble, with the slightest trace of stink weed amongst it, the beef from these cattle is entirely unfit for human consumption, and would ask that anyone having cattle they wish to dispose of this fall be very careful about this.

Will Investigate Peace River

Eddie Aultman and Carl Lucia left for the Peace River district on Monday. The intention is to look the country over thoroughly before their return about Christmas time. The above party, after reaching a point some sixty miles north of Edmonton, were forced to give up the trip by car owing to impassable roads and returned to Champion. There has been heavy rains in the north during the past two weeks.

U. S. Wheat Board Is Castigated

(New York Sun)
What the actual storage bill is on Farm Board grain and cotton nobody not within the Farm Board's most complete confidence is in a position to know. But it is not unreasonable to estimate the cost of wheat storage at somewhere in the neighborhood of \$1,000,000 a month. The grand total for wheat and cotton is close to \$52,000,000 a year. Agencies appointed to manage the disbursement of half a billion dollars may consider a million dollars a week comparatively small change, but to ordinary folk it is big money. It cannot but seem colossal to farmers piling their new wheat on the ground for want of proper storage facilities, to farmers who in some instances are offered less than production cost for their grain, to cotton growers who must necessarily look upon the vast store of Farm Board cotton as a serious obstacle to early improvement in the markets for their commodity. The storage bill ultimately must be paid by taxpayers. The sooner the Farm Board liquidates its wheat business the less will the taxpayers be out of pocket on account of its politico-speculative folly in the commodities market.

Miss Leola Johnson left on Tuesday for Salem Oregon, where she will attend university.

NOTES AND COMMENT

One of the big contentions by the labor party in Great Britain against the reduction of the dole is that business will be decreased. If the solvency of the state was a matter of indifference it might be highly desirable to enlarge the dole to much greater extent than the low retail sales booming and plenty of money in circulation. The trouble is that a day will come as it was coming in the British Isles, when the government would run out of money. Labor is perfectly ready to let the unemployed classes while in order to continue the dole, but to wreck everything and leave nothing does not appeal to the best element in even the labor party.

A year ago there was a general campaign to maintain wages in Canada and the United States at the pre-depression rate, the statement being made that buying power would be decreased by lowering wages, doing more harm than good, lowering of the cost of production would do good. In consequence, where this plan was adopted an effort was made to maintain the price to the consumer. The result has been that consumption has decreased to an extent that reductions have been forced in the end, and the attempt so keep prices up only prolonged the depression, and decreased the possible use of labor.

There have been instances of voluntary decreases in wages but these have been few and far between. Still the present situation is one that demands sacrifices from all who can possibly make them. The attitude of the Alberta government in maintaining expenditures at the peak, particularly ministers' salaries and seasonal indemnities has not been a particularly bright example to the public at large. Are the members of the government and their employees to be the only ones exempt from the pressure of hard times? Was it really necessary to maintain all government services in the face of a national catastrophe? Is this really a policy originated by farmers in farmers' interests, or is it another example of the selfishness which seems to permeate our whole public organization? Little wonder the farmers are advised to go under the Debt Adjustment Act.

Times Were Bad In Late 70's

Times were difficult in the later 70's. As usual there were many attempts to diagnose the causes. Some of the accounts and opinions of that period have a peculiar relevancy today. Culled from among them are these: A view of the situation, whether considered in relation to agriculture, manufacture or commerce, awakes no hope that any branch of business will bring very certain

or large gains to those engaged in it. All the railways needed and many that are not already constructed. All the canals needed (and more than will pay to operate) are already dug. Manufacturers, all that are needed, are built, and in running order. A great proportion of our forests and prairies are subdued and subjected to tillage, so that we can abundantly feed our population and have a large surplus than we can sell. Skilled workmen and operatives work only on half or quarter time. Since the flush times of the war farms have fallen off fully one-half in price, if not more. As to agriculture, if attempted on the basis of present prices, profit is simply impossible.

Debt has assumed appalling proportions. Statistics show that, since the depreciation of property, the debts, public, corporate, municipal and private, aggregate more than property can pay out of its return. We are the victims of overabundance. As a nation we have reached the limits of our development.—Country Gentleman

Highway Building Is Overdone

"You have overstepped yourselves," said Sir Alexander Gibb British engineer, warning against excessive highway building in Canada in an address Monday before the Empire Club. With the exception of air transportation, highway trucking was the most expensive way of moving goods, when the subsidizing of highways was considered, he said. "Some highways are justified when they are pioneer highways and opening up new

sections of the country, but when they become parallel to other means of transportation they are piling up a huge debt which you and your children and your children's children will have to pay," he said. "If I have any criticism to offer—and it is in a kindly spirit that I offer it—you have overstepped yourselves. Your facilities are far in advance of your means." "Transportation is one of the most urgent questions in Canada at the present moment and on it depends the development of your country more than anything else in the world."

Jules Zang secured 25 bushels per acre from his summerfallow and 12 bushels on stubble.

U. G. G. Pays 5 P. C. Dividend

Mr. R. S. Law, President of the United Grain Growers Limited, announced today at the conclusion of a meeting of the Board of Directors of United Grain Growers Limited, that a Dividend of five per cent has been declared on the Capital Stock of the Company, for the financial year July 31st, 1931. Cheques have been mailed to the 50,000 shareholders of the Company.

The accounts for the past year are still in the hands of the Auditors, and are not yet ready for publication, but it is intimated that the balance sheet will show a strong liquid position and that the earnings for the year, after

United Grain Growers Limited

A dividend at the rate of five per cent has been declared on the paid-up capital stock of the United Grain Growers Limited, for the financial year ending July 31st, 1931.

Cheques will be mailed on September 15th, 1931, to shareholders of record at the close of business July 31st.

By order of the Board of Directors, R. S. LAW, President.

Winnipeg, Manitoba, September 16th, 1931.

Bond Interest and Depreciation, were sufficient to justify the payment of a dividend.

While a reduction in grain handling during the current year is considered inevitable on account of the small crop produced in Western Canada, United Grain Growers elevators are fairly well located with respect to those districts in Western Canada which have from fair to good crops this year, and there are comparatively few elevators of the Company in those districts which have experienced complete crop failure.

It was also stated that a release of farmers from contracts to market grain through other channels is resulting this year in an increased percentage of deliveries to United Grain Growers elevators at a large number of points.

United Grain Growers now have 450 country elevators in Manitoba, Saskatchewan and Alberta, a terminal elevator at Port Arthur with a capacity of 2,500,000 bushels, and a terminal elevator at Vancouver with a capacity of 1,000,000 bushels. One of the most important developments of the past fiscal year was the re-entry of the Company into the business of exporting grain, which had been temporarily discontinued.

The Great Importance Of Experimental Farm Work In Fibre Crop Production In Canada

It would be very difficult to estimate in dollars and cents the value of the work done in Canada by the fibre crops division, which operates under the direction of the Dominion Experimental Farms System. The Division of Economic Fibre Production embraces work in a relatively large and varied field of endeavour and is almost as directly connected with manufacturing activities as with cultural conditions.

There are some twenty projects under way at Ottawa in connection with problems that have confronted flax and hemp growers at various times. It is important to have an accurate record of the varieties best suited to the cultural and climatic conditions of Canada, and these records become more valuable as additional information is revealed from year to year.

The application of fertilizers best suited to these fibre plants offers a great field for careful investigation. This work is being carried on systematically at Ottawa, as well as at a number of the branch farms extending from British Columbia to Nova Scotia, so that results may be analyzed, compared and recorded for future reference.

The central experimental farm at Ottawa is equipped with a modern flax mill in which flax and hemp preparing machinery of all kinds are given rigid tests. The farmer benefits from such a service because he knows that if the machinery he is interested in is given an unbiased and thorough test under government supervision, he will receive reliable information concerning it.

Then too, the fibre division of the central experimental farms system renders an extremely important marketing service.

During the year 1930 flax growing in eastern Canada received \$2.50 a bushel c.i.f. Belfast, Ireland for a special variety of flax seed known as J.W.S. This variety was originated by an Irishman named John W. Stewart, and was sent to Canada in 1928 for a test propagation by the Ministry of Agriculture for northern Ireland. During the year 1930-31 the price received for this special pedigree flax seed was \$4.68 per bushel. The business end of these transactions was handled by the fibre division through the Ministry of Agriculture, northern Ireland, and the seed was cleared for the farmers and inspected free of charge by the Canadian Government.

W. J. Megaw of the Ministry of Agriculture for northern Ireland stated in a letter received by the fibre division on the 20th of May, 1931, that "in counties Antrim and Down the demand was largely for Canadian J.W.S."

This report is particularly gratifying in view of the fact that more than Canadian interests are bargaining for this market in Ireland.

During this past year farmers in the districts of Rhineland, Saskatchewan, and Portage la Prairie, Manitoba, were given assistance in the handling of their respective hemp crops. The service was rendered in order to stimulate and encourage the establishment of a cordage industry in the west.

Also, this past year, a specialist was sent from Ottawa to British Columbia to carry on extensive experiments in the growing and handling of flax for fibre purposes. The results showed that British Columbia can produce a quality of fibre that compares very favourably with the best grades of Irish flax fibre.

Another service which has received favourable commendation is the installation of small demonstration flax mills in certain flax growing districts. These mills are equipped with a flax breaking machine and three or four scutching blades, as the case may be. The government supplies the machinery and the interested parties supply the accommodation and the power to run the machinery.

Hundreds of samples of the best flax fibre seed are mailed free of charge to farmers each year and applications for these samples is made to the fibre division from all parts of Canada.

When these facts have been duly considered one realizes the value of experimental farms work in fibre crop production in Canada.

Ocean Travel De Luxe

All-Electric Kitchen Will Provide 12,000 Meals a Day On New Cunarder

A wonderful all-electric kitchen, which will provide 12,000 meals a day, is being planned by the catering experts of the Cunard Line for the new 73,000-ton liner now being built at Clydebank.

The liner will carry over 3,000 passengers and 500 crew, and for the big task of feeding them 100 highly-paid chefs will be employed in the all-electric kitchen. The kitchen has many novel devices, including machines for keeping the ovens and grills at certain temperatures and instruments which wash thousands of plates and dishes in a few minutes. It will also be possible to cook simple dishes without attention.

The wine experts of the company have evolved new methods to ensure that all wines will keep in perfect condition even though the liner may be running through heavy weather. Wines are purchased five years before they are used in Atlantic liners, and for years now the wines for the new Cunarder's cellar have been cellar-wines for the maiden voyage. The cellar will be one of the largest and best in the world.

Great progress is being made in the construction of the Cunarder ship, and the stern bracket, one of the largest ever made, are nearing completion at Dartington and the field. Half the boiler installation is complete, and 1,000 miles of electric cable are ready for installation.

Bonds Of Empire

Earl Jellicoe Refers To Important Part Played By Canada

Great Britain is looking to Canada to provide a lead in strengthening the British Empire, declared Earl Jellicoe, president of the British Empire Service League, addressing an Empire Club luncheon at Toronto.

With this remark was his candid assurance that Britain would surmount present difficulties and emerge successfully from the national crisis.

The Admiral of the Fleet recalled a feeling which existed in the Dominion of the fact that the ships which separate from the Empire and throw in their lot with the United States. The Canada of today was sufficient answer to the fear that such feeling might ever lead to action.

The observation of Empire Day in Canada had developed from that feeling, he said. "It is well that our children should realize the common loyalty which binds the Empire; the tie of blood and of the heart, and honor which we give to our king."

"Canada has played an immense part in the empire's work; Canada has fought in the common cause, and I have no doubt she would do it again."

"We of the Mother Country will look to Canada to give the lead in the strengthening of the ties of Empire."

Radium Not Cure-All

But Has Accomplished Much In Treatment Of Cancer

Cancer control was the greatest problem of health today, and radium had come to the fore as a potent agent. It was not a panacea, for even in skilled hands its results were often disappointing, but, on the whole, the world of medicine could look with satisfaction upon what it had already accomplished. Dr. Joseph Muir, famed New York cancer expert and physical therapist, stated in addressing the convention of the American Academy of Physical Therapy, held at Montreal.

If a man listened to a continuous broadcast for a week the batteries would run down . . . Thank goodness!

FASHION

No. 129—Sports Model.—This style is designed in sizes 12, 14, 16, 18, 20 years. Size 16 requires 2 1/2 yards of 39-inch material with 1 1/2 yard of 35-inch material for the dress.

No. 379—Practical Model.—This style is designed in sizes 14, 16, 18, 20 years. Size 16 requires 3 1/2 yards of 39-inch material for redingote and 2 1/2 yards of 39-inch material with 1/2 yard of 35-inch material for the dress.

No. 505—For School Days.—This style is designed in sizes 8, 10, 12, 14 years. Size 8 requires 2 1/2 yards of 39-inch material with 1/2 yard of 35-inch material for the dress.

No. 754—Smart Day Model.—This style is designed in sizes 16, 18, 20 years. Size 16 requires 3 1/2 yards of 39-inch material with 1/2 yard of 35-inch material for the dress.

Norway Needs Our Wheat

Market For Canadian Wheat In Scandinavian Countries Shows Commission

If Canada is willing to trade on a credit basis, she can cut out Russian wheat to a great extent in Norway, Sweden, Denmark and Finland, stated in Winnipeg recently, H. E. Palmer, Canadian Government Trade Commissioner to Norway.

"Our wheat has a marked preference," said Mr. Palmer, "and if credit arrangements can be made, the wheat pool or any other exporter can, I think, get a good deal of business that is at present going to Russia. The Russians must have cash, and cannot at present anyway, deal on a credit basis."

Tin exposed to extreme cold may crumble to dust.

It is far better to be sometimes deceived than to be always suspicious.

LONGEST SINGLE SPAN BRIDGE IN THE WORLD

Here's a striking aerial view of the Sydney, Australia, harbour bridge, which has been seven years in construction, at a cost of nearly \$40,000,000. As the longest single span bridge in the world, it carries four lanes of vehicular traffic, two electric train tracks and two street car tracks, as well as two foot-bridges for pedestrians only. One million passengers will cross the bridge daily, it is estimated.

Growing Habit Of Buying Empire Goods Gains Impetus In The United Kingdom

Wilkins' Trip Important

Only Way Certain Scientific Phenomena Can Be Obtained

Star that on the bottom of the sea, among other scientific things, has drawn Sir Hubert Wilkins, submarine explorer, into great danger, in the opinion of Vilhjalmur Stefansson, who once led Sir Hubert on his Arctic polar trip.

Infrequently heard from, Sir Hubert is now in the great Arctic ice pack about 300 miles from the north pole, Mr. Stefansson said, "Sir Hubert undoubtedly cannot much longer delay his return from the ice because the summer season virtually is finished."

Mr. Stefansson emphasized the importance of Sir Hubert's trip explaining that in no other way can certain important scientific phenomena be obtained.

"Star that is probably the most romantic of these phenomena. Scientists hold that dust from outer space is deposited in the polar regions in comparative purity, whereas in other parts of the world it is mixed with terrestrial dust. Obviously any samples that Sir Hubert can obtain from the bottom of the sea will be of use to science."

"Sir Hubert also seeks to weigh the earth from the north which is the shortest radius to the centre of the earth. The earth already has been weighed from the equator, where the radius is longest, and a comparison of the two weights will disclose important phenomena about, among other things, the mineral constitution of the earth."

"By use of the Sonic depth finder, Sir Hubert can make an almost unbroken contour map of the bottom of the Arctic sea. Sir Hubert also can observe water life in the Arctic sea as no other explorer could—by actually being under the surface where the life exists. He also can make important weather observations, investigate water temperatures and otherwise fill in the innumerable gaps that exist in our Arctic information."

Probably three years will be needed for the completion of the work of the expedition.

How To Keep Milk

Keeping Milk In Proper Condition For Home Use

Four little words tell the whole story about how to keep milk in proper shape for use in the home. These are "Clean, Cool, and Covered." This is one of the fundamental rules of home economics to which the Dairy and Cold Storage Branch calls special attention. For best results milk should be served at the end of the meal, and it should always be stepped slowly. Milk is the ideal food for children of all ages because of its high quality and quantity of protein, its abundance of calcium, its readily assimilable phosphorus content, its fat and its easily digested fat and sugar.

Industrial Moose Jaw

Moose Jaw now has an industrial area of about 50 city blocks, the city council having set aside three subdivisions for the purpose—Prairie Heights, Westmore and Sunnyside. The area lies roughly between the main line of the Canadian Pacific and the Outlook line branch.

Time cannot remove kindly act from a grateful heart.

Manitoba Wheat

Test Shows High Protein Content This Year

Dr. F. J. Birch, head of the research laboratory of the Canadian Board of Grain Commissioners, in a test made for protein content in the wheat crop of Manitoba, shows that the wheat crop of the province has a maximum of 18.3 per cent, as against a maximum of 14.5 per cent. last year and a minimum of 10.2 per cent. this year as compared with 8.4 per cent. last; the average being 12.25 per cent. against 11.2 per cent. in 1930. The test grains were taken from the same districts as last year.

Grain Grades High

Exceptionally High Quality Of This Year's Crop

"Grain which has passed through the inspection department at Winnipeg in the last few days is of exceptionally high quality," it was stated by J. D. Fraser, chief grain inspector at Winnipeg, in a recent address before the officials of the World's Grain Exhibition and Conference at Regina. "A considerable amount has gone No. 1 hard; a great deal has graded No. 1 Northern, and some has graded No. 2 Northern on account of mixtures of durum and barley."

"Good morning, is your mistress at home?"
"No, I'm sorry, this is her day out"—Hummel, Hamburg.

'Fresh from the gardens'

Courtesy and Safety

"Why is it," remarked the Observant Man, "that a man, who may accidentally jostle you in a crowd, turns and says 'I'm sorry, or 'I beg your pardon,' but who, when he gets behind the steering wheel of a motor car, throws all ideas of courtesy to the winds and acts as if you had no rights whatever, even the right to live?"

It is the unenvied puzzle of the present age. A man ordinarily polite and courteous, who, if he bumped into another couple when dancing, or stepped on his partner's toes, would express his regrets, when engaged in motoring act, too frequently, like an ignorant, uncouth bore. He who would hesitate to steal as much as a lead pencil from another, thinks nothing at all of stealing the right-of-way at a road intersection, even from a lady, considers he has done something smart, and even deserves or justifies those whom he has made his victim. Yet he is guilty of theft, not only in the moral sense but actually in a legal sense, for the law declares it an offence to take the right-of-way from another to whom it belongs.

Many a motorist, who, if standing on his own two legs on the shore of a lake would never even entertain the thought of pushing a non-swimmer into deep water at the peril of his life, nevertheless does not hesitate to crowd a fellow motorist—possibly a beginner in the art of driving—off the road at the risk of smashing the other's car and possibly seriously injuring or killing him.

And why is it that so many men, ordinarily polite and courteous, reelin in language and manner, become abusive, profane and quarrelsome over some slight mishap on the road? What is it about a motor car, or the pleasure or business of motoring, that so completely changes many men, and women, too, from their usual tenets of conduct into the most disgraceful creatures, reckless and regardless of the rights, comfort and safety of others?

Is it merely because the modern motor engenders such speed that the drivers of cars become so bad, and for the time being at least are no longer human beings? Or is it that peculiar quick in our human makeup that seems to impel us to do what both commonsense and the law says we are not to do?

The conduct of a few, but countless thousands of motorists is an unsolved mystery. No man, except he be a fanatic, would think of throwing vitriol into another's face and thereby blinding him, but to anyone used to travelling on highways at night, and who has seen the vast majority of motor car drivers think nothing at all of driving past approaching cars with powerful, glaring headlights completely blinding for the time being the drivers of those other cars, and inviting terrible disaster. Is it that they are just too lazy to be even bothered to dim their own lights for a few seconds? Or is it something else, some petty meanness of disposition, some un-understandable twist in their character which does not at other times display itself?

And yet courtesy is such a fine trait, a simple thing, something that costs nothing, but which is the hallmark of the true gentleman.

And how much pleasure it would add to motoring if courtesy, instead of a rude boorishness, became the universal habit of the road! And oh, how much it would add to the safety of the road!

Governments provide rules and regulations governing the conduct of cars; Automobile clubs and associations conduct campaigns of education; tests are provided for brakes, lamps, tires, steering gear, etc., and all serve very useful purposes. But a uniform, universal recognition and acceptance of the ordinary rules of courtesy by one toward another, and by each toward all, would do more than any one thing to obviate accidents by their present appalling bills for damages and irreparable loss of life.

As a nation we are striving with might and main and the expenditure of fabulous sums of money to combat tuberculosis, cancer, and dread diseases of one kind and another; we are engaged in conservation of our forests, our streams and water-powers, our fisheries, our minerals; we spend millions on research work to combat wheat, grasshoppers, and other pests which destroy the proceeds of our agricultural labours,—yet we go blithely on taking human life recklessly, needlessly, maiming many more, and destroying millions of dollars worth of property through the agency of the automobile, which to many has become a dread and a menace when it ought to be a joy and a blessing.

And such a little thing as a simple thing, as the practice of a uniform courtesy would serve to revolutionize the situation for the better. Why not try it for a change! Let a little courtesy do its good work.

Alberta Oil Wells

Fifty-Seven Million Dollars Expended in Drilling Operations

More than \$57,000,000 have been expended and more than a million feet of borings done in Alberta in the search for oil during the last thirty years, according to the recapitulation made by J. L. Carmichael, Lethbridge engineer. In all, some 407 wells have been drilled, not including the 100 stone field for which no reliable estimate is available. Of the drilling done, 160 wells in Turner Valley have drilled 650,000 cubic feet—done and the province's total of 1,167,787 feet.

Hiking the Soft Way

We endorse enthusiastically the idea of the man who is crossing the continent in a wheel chair. We, too, have always felt that we should like to take a good, long hike, if we could do it sitting down.

While was some colour of royalty during the stages of Egypt's ancient history.

The Mother of Seven Children Used It for Diarrhoea

Mr. Ray Drinkwater, R.R. No. 2, Hagersville, Ont., writes:—"I am the mother of seven children, and last summer one of them, 17 months old, was taken very sick with diarrhoea and I thought she was going to die."

"My husband went 7 miles to see what my sister had given her baby, and he came home with a bottle of Dr. Fowler's Extract of Wild Strawberry. I gave the child a few doses and she was soon well again."

"My other children also had diarrhoea at that time and I gave them Dr. Fowler's with the same results."

Japan's Population

Is Increasing By Nearly a Million Every Year

One having announced lately, with some confidence, that the population question in the Japanese Empire would settle itself because the rate of increase was steadily slowing down, the figures of the 1931 census now emerge to shatter that comfortable doctrine. The birthrate in Japan is not going down, it is going up. And the population is increasing at present by nearly a million every year. That fact may not be as disturbing to the rest of the world as it sounds. The Japanese, for all their apparent need for emigration grounds, still show little desire to emigrate on any considerable scale. But the alternative is to convert Japan systematically from an agricultural into an industrial State.

DRAPERIES MADE NEW

"When we resumed housekeeping a month ago I found my draperies had become soiled from packing and taking them out on the line, hoping to get them clean. I decided to try the result. The result was they became really new. I was heartiest until the happy thought struck me to dye them. I just dyed them in deeper tints, and as I used Diamond Dyes they look better than new. They give a new color—when used either for tinting or dyeing—and never take the color out of cloth as other dyes."

Mrs. J.P.T., Montreal.

Preparing Relief Camps

Ontario Government Getting Plans In Shape For Emergency

Payment of 30 cents an hour for an eight-hour day, with a deduction of 50 cents a day for board and 50 cents a month for medical service will be made to men employed in the relief camps being established in northern Ontario by the provincial government for the construction of the Trans-Canada Highway.

Official details of the administration of the camps were issued by Hon. William Pinckney, Minister of Lands and Forests. Present plans are to have the camps in operation early in October.

There will be no military methods but provincial police will be available wherever required at the camps.

U.S. Increases Postal Rates

Rates To Canada and Great Britain Are Changed

New increased postage rates on United States letters and postcards mailed to foreign countries are now effective, the postoffice department announced. The rate on letters and postcards to Canada and Newfoundland was increased to three cents for letters and two cents for postcards. Rates to Great Britain and Newfoundland and the Irish Free State were increased to five cents for letters and three cents for postcards. The new rates for airmail letters to Newfoundland is six cents for the first ounce and 10 cents for each additional ounce.

Douglas' Egyptian Liniment is an excellent leg wash for rheumatism, moves cars in horses and quickly relieves rheumatisms, sprains, swellings and joint stiffness.

Has Tame Butter Flies

A Philadelphia has developed what is said to be one of the finest collections of fly butterflies in the United States. For many years Daniel G. V. Lanning has made a study of the beautifully coloured insects, raised them and tamed them. Now, he says, they will alight on his paper while he is reading and not move until he is ready to turn a page.

Persian Balm invests every woman with the delicacy and grace of a fragrant. Cooling and healing. Diaper rash, roughness or chafing. Makes skin delicately soft-textured. Every woman should use this precious toilet requisite. Balm of Persia—refinement—Persian Balm achieves these in every instance. Softens and whitens the hands. Promotes clear and youthful loveliness. All women who care for additional charm unhesitatingly choose Persian Balm.

Bears Killing Alberta Cattle

Right to shoot bears in Waterton Lakes National Park in southwestern Alberta, was sought by ranchers of the district. Cattle on ranches in the territory have been killed and carried within the park confines before ranchers were able to defend their cattle.

A newspaper man's son says that editors call themselves "we" so that the man who doesn't like the article will think there are too many people for him to tackle.

Workshops where blind men and women may earn a living are being established in Italy.

W. N. U. 190"

POT HIM OFF HIS PIPE

Indigestion and Acidity

"A few months ago, I had an attack of indigestion, heartburn and acidity, and had no appetite for meals, especially breakfast. I am a pipe smoker, and for several days I felt so I could not even look at my pipe. I decided to try Kruschen's. A few days afterwards I found the indigestion had gone, and for the last five or six years I have been in good health. I can now smoke my pipe-smoking, and in fact feel better than my younger years."

After your digestive juices fail to flow freely your food lies in the system and ferments, thus causing the distress of indigestion. The "little daily dose" of Kruschen first stimulates the flow of the gastric juices, and then causes complete, regular and unflinching elimination of all waste matter every day.

Woman Wins Air Derby

Aviatrice From Memphis, Tenn., Carries Off All Honours

Mrs. Phoebe Cottle, of Memphis, Tenn., was officially announced as the winner of the transcontinental handi-cap derby from Santa Monica, Cal., after she had taken a share of the honours at the national air derby. The contest committee announced that Mrs. Cottle had won the share of the honours at the national air derby, in which 50 or more women and men competed, with a rating of 100.19 points. She won the grand prize as well as the prize for the women's division. D. C. Warren, of Alameda, Cal., was the men's division of the race with 105.5 points.

Bronze Statue Honours Hardy

Unveiled By Sir James Harris At Dorchester, England

Unveiling a life-size bronze statue of Thomas Hardy, the work of Eric Kennington, here in Hardy's native Dorchester, Sir James Harris, creator of "Peter Pan," told how nearly the world came to lose the work of the late novelist's services.

"When the little Hardy was born," Sir James said, "the doctor thought him dead and dropped him into a wet ket. But a woman stepped forward to make sure and found he was alive. A statue to this woman—Mr. Kennington could have done worse than give it to us."

It is usually safe to say that when a child is pale, sickly, peevish and restless, the cause is worms. These parasites clog the stomach and intestines, causing serious disorders of the digestion and preventing the infant from deriving sustenance from the mother's milk. By restoring the worms, correct their digestion and prevent them from the organs to healthy action.

Co-Operative Wool

Manitoba and Saskatchewan Shipments Reach High Figures

The Canadian Co-Operative Wool Growers, western branch, report the receipt during July of 552 lots of wool at Regina, and of 502 lots at Portage la Prairie; the total gross receipts amount to 206,824 pounds, and Saskatchewan receipts, about 333,000 pounds. The total gross receipts have been shipped from Regina, seven from Portage la Prairie and one from Marchand. During the month our consignment received from Manitoba sheepman, covering 130 fleeces and thirteen contracts from Saskatchewan sheepmen covering 984 fleeces.

Drives Asthma Before It

The smoke or vapor from Dr. J. C. Kellogg's Asthma Remedy gives asthma no chance to linger. It eradicates the cause. Our experience with the relief-giving remedy shows how actual and positive is the success it gives. It is the result of long study and experiment and was not submitted to the public until its makers knew it was their work well.

High Quality Canadian Cattle

Shipments of Canadian cattle to Great Britain have shown at times of such a high quality that the livestock sold on a par with Scottish home-killed beef according to John Byers, secretary of the Canadian Western Beef Producers. The Canadian cattle he added, at some periods, had been sold in preference to the Irish importations.

"Pop, here, Pop!" Don't talk that way, Oswald, I'm in the grocery business, not a fountain clerk."

Market For Canadian Apples

Big Campaign In France To Exploit Canadian Fruit

A consignment of more than a million Canadian apples soon will be on sale in automatic vending machines at Paris in a big campaign to make France eat Canadian fruit.

The final details of the campaign remain to be settled, but French importers already have made a cash offer for 7,500 boxes of Canadian apples, realising their superiority over the French variety.

At the same time, negotiations are far advanced, whereby a Canadian company will install 2,000 vending machines along the boulevards. It is expected that each machine will sell 60 apples daily at one franc each, which is cheaper than the retail price of apples in Canada.

This enterprise is the result of the initiative of the Canadian trade commissioner's office, which also has just informed the French Ministry of Agriculture to grant a concession to Canadian apple exporters allowing them to store their apples at Le Havre without paying the customs duty until the apples are sold.

This concession on the part of the French authorities will permit the holding of fortnightly sales of Canadian apples in France. It is expected that such sales will be started shortly.

Previously, consignments on which the customs duty had been paid, remained unsold at French ports, causing a heavy cash loss to Canadian apple growers.

Byng May Retire

Has Accomplished Task Of Police Reforms In London, England

According to the Daily Mail, Lord Byng, former governor-general of Canada and now commander-in-chief of the metropolitan police, intends to announce his retirement from the commission after the end of the year. The paper says Lord Byng has accomplished the task of cleaning up the west end of London and the institution of police reforms which he had set for himself when accepting the appointment in 1928. He is now anxious to retire to his Essex home, the new house at Broom's Barn.

Sir Trevor Bigham, deputy commissioner, who married Lord Byng's secretary, is expected to succeed to the command of the metropolitan police, the Daily Mail declared.

Barred From U.S.

William Shier, 48, who was returning to his home in Gary, Ind., after being two weeks at the bedside of his mother in Newmarket, Ont., has been refused re-entry into United States by United States immigration authorities. It is alleged that he entered United States illegally seven years ago at Port of N.D.

"Malinda, would you sing something for our guests?"

"Oh, I'd, dear, it is so late; and besides they are beginning to go."

"Yes, but not quickly enough."

Willow-Cane, we suppose.

Want Child Marriage Banned

Renewed attempts to abolish the Sarda Child Marriage Restraint Act forbidding marriage to children before the age of 14, has been made by Indian legislators. The authors contend that the Sarda Act constitutes an invasion of sacred religious customs of the Hindus, reaching back thousands of years and allowing children to be betrothed in marriage even in infancy.

The average farm in Belgium this year covers less than 15 acres. Much of the threshing in Belgium this season is being done by hand.

No Longer

Bilious—Thanks

Vegetable Pills

"I suffered with biliousness for days at a time. Every medicine I tried failed to bring relief... the first dose of your wonderful Carter's Little Liver Pills gave me great relief."—Mrs. C. Leigh.

Carter's Little Liver Pills are so ordinary laxative. They are ALL VEGETABLE and have a very delicate, valuable tonic action upon the liver. They cost nothing, and induce no constipation, indigestion, acidity, heartburn, poor complexion. All druggists. 25c & 75c red packages.

ZIG-ZAG

Cigarette Papers

Large Supply of Zig-Zag Cigarette Papers. 100% Pure. Can Buy 1000s at a Time. Avoid Imitations.

Saskatchewan's Cancer Campaign

Hon. Dr. Munroe Announces Opening of Radium Emanation Plant and Cancer Clinic

Saskatchewan has the lowest death rate from tuberculosis, cancer, diseases of the heart, pneumonia and automobile accidents.

These statements of fact are based on Canadian Vital Statistics for 1920, recently released by the Dominion Bureau of Statistics. They demonstrate, unequivocally, Saskatchewan's leadership in matters pertaining to the health of its people.

While several factors have contributed to the spectacular showing of Saskatchewan in statistical records giving the comparative death rates of the various provinces and Dominion one that should not be overlooked is the very effective contribution made by the Saskatchewan Department of Public Health, presided over by Hon. F. D. Munroe, M.D., as Minister. The province is noted for its advanced health service and its achievements in the campaign against tuberculosis are particularly well-known to require citation. It was only to be expected, then, that when cancer started to claim particular attention as a "major killer," Saskatchewan should have taken the province of Canada to tackle the disease as ruthlessly as possible.

The psychological opportunity came in 1920, with an exceptionally favourable combination of circumstances. The medical profession had surveyed the cancer situation and recognized the necessity of intensive efforts being made to combat the disease with security. But someone was required to crystallize the thoughts and ideas of the medical men into action. That person presented himself in Dr. Munroe, having been elected to the Legislature as member for Moose.

THE COUNCIL IN JERUSALEM

Golden Text: "For ye brethren, were called for freedom; only use not your freedom for an occasion to the flesh. But through love be servants one to another."—Galatians 5:13.

Lesson: Acts 15:1-35; Galatians 2:2. Devotional Reading: Romans 8:13.

Explanations and Comments

A Deputation Sent From Jerusalem to the Church at Antioch, Acts 15:2-29.

With a total capitalization of \$45,000, three companies were incorporated in Saskatchewan during the first week of September, according to the Gazette.

Fewer youngsters and more on people are shown by the Census Bureau to be in the United States than were counted a decade ago. The percentage of children was reported to be highest in the rural districts.

According to the Daily Mail, Lord Byng, former governor-general of Canada, and now commissioner of the Metropolitan Police, intends to announce his retirement from the commission before the end of the year.

With the avowed aim of alleviating unemployment among white workers in British Columbia, Hunting-Merritt Lumber Co., Ltd., producers of shingles, have replaced all Orientals at their Marpole plant with white men.

Organized labour showed its strength of numbers in a mile-long parade which passed in review through crowded Montreal streets. The parade was interspersed with floats, each depicting some form of daily toil.

Country Cousin (in town)—Out in the country we have to treat the maids and other help like one of the family!

City Cousin—Goodness! Really? Here we have to treat them with great respect!

Use of motor vehicles has increased more rapidly in Japan than in any other country in the Far East, registrations growing from 22,000 to nearly 90,000 in the last six years.

Britain is now supplying bicycles to the whole world, except France.

W. N. U. 1907

case cases. This emanation plant, it is stated, will not only produce sufficient funds to meet provincial requirements, but will ultimately be the source of supply of provinces to the west.

The story of Saskatchewan's campaign is best told in the words of its author and sponsor, Hon. Dr. Munroe.

"It was in June of last year, that I announced the opening of the Saskatchewan Cancer Commission and, since their appointment, the members have been giving their attention to the various problems involved.

"I should be re-assured that this Commission is not a temporary one, but a permanent one. It is my duty to carry out the provisions of the Act, its functions including inquiry, education and treatment. We have been able to place an order for radium and radon in receipt of the first shipment which is in the form of radium bromide for use in the preparation of radon, or radium gas.

"In the outstanding clinics of the world, two methods of using radium in the treatment of cancer are considered valuable. One is the use of radium gas enclosed in suitable containers or applicators ("seeds"), and the other is the use of radium salt enclosed in needles and tubes made of platinum against tuberculosis are for well-known to require citation. It was only to be expected, then, that when cancer started to claim particular attention as a "major killer," Saskatchewan should have taken the province of Canada to tackle the disease as ruthlessly as possible.

The psychological opportunity came in 1920, with an exceptionally favourable combination of circumstances. The medical profession had surveyed the cancer situation and recognized the necessity of intensive efforts being made to combat the disease with security. But someone was required to crystallize the thoughts and ideas of the medical men into action. That person presented himself in Dr. Munroe, having been elected to the Legislature as member for Moose.

Lesson: Acts 15:1-35; Galatians 2:2. Devotional Reading: Romans 8:13.

The campaign against cancer, then first conceived in 1920, was presented in tangible and actionable form in the 1920 session of the Legislature when Dr. Munroe, in his first session as Minister of Public Health, introduced the Saskatchewan Cancer Commission Bill. The bill was passed and was voted a sum of \$115,000 for the purchase of radium and equipment. This was the first time in the history of the province that the Legislature had voted money for administrative purposes.

Pursuant to the Act, a permanent Saskatchewan Cancer Commission was appointed, the members being Hon. Dr. Munroe, Dr. David Low, M.D., and Dr. J. H. McLeod, M.D., Director of the Communicable Diseases Division of the Department of Public Health. Dr. Munroe and Dr. Low are graduates of the University, while Dr. Davidson is a graduate of Toronto.

When the Commission started its gigantic task assigned to it, difficulties were experienced from the start in arranging for the supply of radium essential to the programme contemplated. During the interim between application for, and actual purchase of, a sufficient supply to start operations, contacts were established by which the Commission obtained access to the latest data in cancer research were experienced from the start in arranging for the supply of radium essential to the programme contemplated. During the interim between application for, and actual purchase of, a sufficient supply to start operations, contacts were established by which the Commission obtained access to the latest data in cancer research.

So well were the plans laid that, immediately after the receipt of the first shipment of radium, the first emanation plants west of Montreal had been established at the University of Saskatchewan to supply clinics in the main centres with radium for use in the treatment of cancer. The first shipment of radium was received in this province in 1920, the death rate from cancer in 1928 was 125.3 per 100,000 population, whereas in 1929 it was 100.0 per 100,000 population. The death rate from cancer in 1928 was 125.3 per 100,000 population, whereas in 1929 it was 100.0 per 100,000 population. The death rate from cancer in 1928 was 125.3 per 100,000 population, whereas in 1929 it was 100.0 per 100,000 population.

"Saskatchewan is situated very favourably for the purpose of cancer research. The climate is mild, the soil is fertile, the people are healthy and the death rate from cancer is low. rate from cancer was only 8.8, whereas in 1919, it was 33.1 per 100,000. This can be seen that cancer rates are increasing at an alarming rate. In the ten-year period prior to 1928, the rate was 33.1 per 100,000. In the ten years in Saskatchewan, between 1919 and 1928, the rate was 33.1 per 100,000. This means the rate has practically doubled in that period.

"It is recognized that cancer cannot be dealt with in a manner that will produce satisfactory results, unless cases are available for treatment in the most modern and equipped hospitals. It is believed that more satisfactory results will be obtained by such procedure than by having separate institutions for cancer cases in two centres.

"In addition to this, the programme of cancer research is being carried out in the most modern and equipped hospitals. It is believed that more satisfactory results will be obtained by such procedure than by having separate institutions for cancer cases in two centres.

Hunt For Hidden Treasure

Sir Malcolm Campbell Said To Be Interested In Cocos Island Quest

Sir Malcolm Campbell, world automobile speed king, has joined J. E. Leckie, of Vancouver, in his enterprise to head an expedition this year to search for hidden treasure on Cocos Island.

Sir Malcolm has been accepted as a directorship in the company which will finance the Leckie Expedition, and for a concession to again hunt treasure there. The Vancouver company, however, had already obtained the concession, the result being that Sir Malcolm has taken an interest and a directorship in the company.

Sir Malcolm is not unacquainted with Cocos Island and its alluring history. In 1926, he spent some time there hunting treasure. His party was poorly equipped, however, according to his own admission, and was not successful.

Recently the British speed king opened negotiations with the Costa Rica Government, which owns Cocos Island, for a concession to again hunt treasure there. The Vancouver company, however, had already obtained the concession, the result being that Sir Malcolm has taken an interest and a directorship in the company.

THE RHYMING OPTIMIST

By Aline Maclellan

BEGINNING AGAIN

This is the joy morning brings,

When the happy linnets sing.

As singing through the reeds refrain

I catch the words, "Begin again!"

Dawn brings lost courage back anew,

Brave dreams once more are coming true.

My heart reiterates the note

Morn wakens in the linnets' throat.

"Begin again and never fear,"

I hear the voice of cheer,

"Begin again and know but this:

Man's life is a chance shaped for bliss!"

No failure now can touch my days,

No lost cast shadows on my ways,

I have forgotten doubt and pain

In challenge of this brave refrain.

"Begin again, begin again,

For sure your dreams are coming true;

Forget the past and know but this:

Man's life is a chance formed for bliss!"

Louisiana leads the United States

in quantity production of furs.

"I wanted to ask you if you could use a barometer?"

"Can I see it?"

"I can show you one with functioning mechanism."

"—Lustige Blaetter, Berlin.

"—Lustige Blaetter, Berlin.

"I wanted to ask you if you could use a barometer?"

To My Friends of Champion and District:

Please accept my sincere thanks and appreciation for the large number of friends and customers that visited my new Store on the opening day, Sept. 12th, 1931.

The large crowd was in a way unexpected, and if some of you did not receive the attention to your requirements as you should have received, please accept my apologies, with the assurance that in the future when my store is completed and the organization extended your everywant will be fully attended to.

It is my intention to carry a large and varied stock, of the best procurable, to be sold at a price to suit everybody's purse. It will not be necessary for anyone now to trade outside of town. Prices in the new Champion Groceteria will compare favorably with any of the stores in the larger centres.

Soliciting your further patronage.

E. LATIFF

Local and General

Mrs. Keeley of Brant is the guest of Mrs. G. M. Campbell. Dr. and Mrs. Freeze attended the opening of St. Michael's hospital at Lethbridge last week.

Found—On Fireguard trail west of Fred Alder's, a leather coat. Owner may recover same at the Chronicle Office.

Dell Sommers, who has been here looking after crop interests left for his home in Vancouver by motor car this week.

Miss Margaret Patterson is ill in the Holy Cross hospital, Calgary. She was accompanied to the city by Mrs. Patterson.

Mr. and Mrs. F. J. Clapp drove to High River on Sunday morning. Mrs. Field, who had come to that point from Calgary.

The weather, after several uncertain days, seems to have settled down and the remainder of the threshing is now under way.

The Ladies' Aid are serving luncheon to the visiting ministers and their wives on Sept. 23rd. The Community Hall will be used for the occasion.

The Calgary Fall Stock Show and Sales will be held, November 2nd to 4th. Girls' and Boys' lamb and pig feeding competitions will be as usual be a feature.

Owing to the Elks' dance on Friday the 18th the regular Saturday night dance on the 19th will not be held but will be continued on Saturday the 25th.

The United Church Ladies' Aid will meet at the home of Mrs. W. Ulrich on Thursday, Sept. 24th. Cars will be at the church to start at 2 o'clock sharp.

Those taking normal training in Calgary include the Misses Edna Orr, Rheta Campbell, Ruby Alder, Helen Holm, Gertrude McNaughton and Marie Gardner.

Keep in mind the big Rally in the Church on Sept. 23rd. When the Rev. K. W. Prior, agricultural missionary of Angola, Portuguese West Africa will be the speaker.

Already "The Bad Man" is the talk of the town. His deeds, his daring, his ways, his women are on the lips of Detroit. Wednesday he'll be here to "make us love himself, person ally." He ready to join the crowd at the theatre.

H. E. Tindal was a business visitor to Calgary recently.

General appreciation of the picture show on Wednesday night was in evidence. These shows are growing rapidly in popularity, the sound effects being exceptional.

Frost was reported from different parts of the district on Monday, Tuesday and Wednesday. Some very tender garden products, however, seem to have escaped almost wholly in Champion.

According to reports from Manitoba, some people are beginning to wonder if we employ too many politicians to debate our unemployment problem for us—Albertans.

K. R. McLean, R.O., of McLean & Anderson, Sight specialist, 224-8th Ave West, Calgary will make his monthly visit to Champion, Friday, October 2, at the Drug Store.

Mrs. Alex McDougall left for Calgary on Monday to attend the wedding of Miss Annie Campbell, at one time a member of the local telephone staff in Champion.

We are sorry to announce that Mr. G. G. Coote, U.F.A. member for High River in the federal house will be unable to meet with us on Sept. 23rd, but hopes to be with us at some future time.

At Vulcan business men have expressed the view that the working of the Debt Adjustment Act requires local supervision to protect all interests, it being pointed out that in many instances far from satisfactory results were obtained. Further advertising of the act was also frowned upon.

Mr. and Mrs. H. E. Gill and Miss Flo motored to Keith on Sunday on a visit to Miss Ena Gill who is in the sanitarium there. They found the patient decidedly improved and thoroughly accustomed to her surroundings, which are exceptional. Miss Ida Stoddart accompanied the party.

Farmers who are turning beef cattle out in stubble fields are taking a risk of the animals eating stink weed, and spoiling the meat. This has already happened locally, and on enquiry has been quite common this year at many other points. An animal that has eaten stink weed requires about thirty days to get rid of the effects, which result in absolutely worthless meat. This pollution would appear to be rare, but it is quite evident this is a banner year for this difficulty.

Mrs. F. C. Aleock visited the Esigen Women's Institute last week, the members presenting her with an illuminated poem (Friendship's Road). The Barons W. I. also the Garden Prairie, have each sent books to her expressing their affection and good will towards her, in fact most of the branches have sent gifts, flowers, etc. She feels she cannot adequately express her appreciation and thanks.

There was no general effort made to assist in opening the shooting season. Only the most enthusiastic of the local sportsmen making an effort to celebrate the big day in the usual style.

For Sale

100 High-grade Yorkshire Weaner Pigs, any part thereof. Apply to Albert Anderson, three miles south and four and one-half miles east of Champion.

Through the excitement of moving and the resulting confusion, mention of the return of J. S. Collins and family from their holidays was omitted. The statement is not made now as a matter of news but simply to prevent the assumption that we missed the news item altogether. It is understood the holiday was a complete success in every way.

Alberta Pool Elevators Under Public License

Alberta Pool Elevators are now operating under public license.

This permits the Pool Elevator to buy or handle any grain. Pool Elevator facilities are not restricted to the handling of Pool members' grain only.

The reputation for fairness gained by Pool Elevators should be an inducement for all grain growers to patronize these elevators.

Any person delivering grain to Pool Elevators may sell his grain in any way he selects and at any time desired.

When in Doubt, Try a "Want" Ad.
